INDEX

Absolute probabilities, 213.
α-sets, 64, 101.
ANDERSON, T. W., 485, 489.
A posteriori chance, 333.
A posteriori distribution, 496.
  inequalities for, 496.
A posteriori probability of unknown mean value, 352.
A priori chance, 333, 334, 496.
  constant, 335.
Arbitrarily linked events, 192.
Attribute, *see* Label value
Average, *see* Sample mean
Axioms of Kolmogorov, 54.
Axioms of Tornier, 101.
BACHELIER, P., 324.

BANACH, S., 44, 55, 73.
Banach-Caratheodory-Kolmogorov extension theorem, 55.
BARTKY, W., 527.
BARTLETT, M. S., 598, 609, 668.
BAWLY, G., 280.
Basic set of order n, 61, 100.
  decomposition of, 63.
BAYES, T., 24, 329, 335, 342.
Bayes' distribution, *see* Beta distribution
Bayes' method, 329.
Bayes-Laplace result, 349.
Bayes' problem, 330.
  limit theorems for, 345.
Bayes' theorem, 339.
BERNOUILLI, J., 46, 236.
Bernouilli distribution, *see* Binomial distribution
Bernouilli problem, 166.
  Laplace's solution of, 274.
Bernouilli's theorem, 173.
BERNSTEIN, F., 312.
BERNSTEIN, S. N., 276.
BERTRAND, J., 34, 159, 160.
Bertrand's box problem, 159.
Beta distribution, 336, 337.
BIENAYMÉ, I.J., 352, 357.
BILLINGSLEY, P., 471.
Binomial coefficients, 168.
  tables of logarithms of, 676.
Binomial distribution, 168.
  asymptotic distribution for, 272.
  characteristic function of, 247.
  convergence toward normal distribution, 261.
  mean of, 170.
  moment generating function of, 170.
  Poisson approximation to, 179.
  variance of, 170.
BIRNBAUM, Z. W., 491, 492, 682, 685.
BLACKWELL, D., 564.
BLANC LAPIERRE, A., 668.
BLASCHKE, W., 166.
BOREL, E., 7, 56, 236.
Borel field, *see* σ field
Borel-Cantelli theorems, 241.
BORTKIEWICZ, L. von, 444.
BRIDGMAN, P., 110.
Brownian movement, 180.
BRUNS, H., 135.
Bruns' series, *see* Edgeworth series
BUFFON, G. L. L., 162, 164.
Buffon's needle problem, 162.

CANTELLI, F. P., 52, 236.
CANTOR, G., 83.
Cantor set, 71, 86.
CARATHEODORY, C., 55, 94, 96, 97.
Card shuffling (as a Markov chain), 218.
Cauchy distribution, 247.
  characteristic function of, 247.

Central limit theorem, 276, 280, 289, 304.
for arithmetic distribution, 279.
in the case of densities, 289.
Liapounoff's conditions for, 302.
Lindeberg conditions for, 294, 299.
Chance variable *see* random variable
CHARLIER, C. V. L., 135, 375, 479.
Chapman-Kolmogorov equation, 214, 326.
Characteristic equation, 215.
Characteristic function, 243, 245.
continuity theorem, 257.
inversion of, 250.
of binomial distribution, 246.
of Cauchy distribution, 246.
of gamma distribution, 248.
of Helmert's distribution, 238.
of normal distribution, 246.
of Poisson distribution, 246.
uniqueness theorem, 252.
CHERNOFF, H., 469, 656, 657.
Chi-square distribution, 403.
as a limit distribution, 410.
as sum of squares of normally distributed variables, 406.
asymptotic formula for, 407.
characteristic function of, 248.
mean of, 405.
moments of, 405.
stability of, 405.
tables of, 679.
variance of, 405.
CHUNG, K. L., 668.
Closed sets, 63.
COCHRAN, W. G., 467.
Collectives, 11, 12, 40.
consistency of, 39.
dependent, 32.
independent, 30.
operation on, 15, 16, 22, 26.
Combinable and independent, 31, 35.
unsatisfactory definition, 36.
Combinable but interdependent, 32.
Combining, 26, 29.
Complementary set, 18.
Completely additive set function, 21.
Completely dependent variables, 568.
Compound Poisson distributions, 308, 310, 313.
mean of, 316.
variance, 316.
Conceptual verifiability of probability statements, 59, 79.
Conditional density, 144.
Conditional distribution, 144, 150.
Conditional probability, 25, 144.
Confidence intervals, *see* Confidence limits.
Confidence limits, 537.
examples of, 540 ff.
CONSOLI, T., 280.
Contents, 62, 77.
inner, 77.
outer, 77.
Contingency coefficients, 580.
COPELAND, A. H., 43, 47, 73, 99.
Convergent sequence of sets, 79.
Correlation, 566.
Bernouilli, 572.
in k variables, 599.
measure based on c.d.f., 582.
matrix, 600.
normal, 571.
Correlated variables, 568.
Convex set, 616.
Convolution, 249.
generating function of convolution, 248.
Coorelation coefficient, 568.
asymptotic expectation and variance of, 584, 587.
distribution in normal samples, 591, 594.
distribution of partial, 607.
Fisher's transformation of r, 596.
multiple, 601, 606.
partial, 601.
Covariance matrix, 149.
CRAMÉR, H., 44, 45, 47, 57, 60, 78, 137, 304, 375, 472, 561, 587, 668.
Cumulative distribution function, *see* Distribution function.

DARLING, D. A., 479, 485, 489.
Darboux-Stieltjes integral, 97.
DARMOIS, G., 561.
DAVID, F. N., 595.
de MÉRÉ, CHEVALIER, 157, 158.
de Méré's problem, 158.
de MOIVRE, A., 261.
Denumerably infinite, 3.
Deviation tests, 490.
Kolmogorov-Smirnov tests, 490.
Smirnoff's two sample test, 492.

tables for Kolmogorov's statistic, 683 ff.
tables for one sided test (Smirnoff), 682.
Difference set, 20.
Diffusion equation, 288.
Dispersion, *see* sample variance.
Distribution functions, 50, 53, 57, 615.
absolutely continuous, 95.
bounded, 619.
discrete case, 51.
general case, 92.
space of, 615.
uniformly bounded, 619.
Distribution function in R_n, 140, 141.
Division intervals, 68.
DODGE, H. F., 527.
DOMIZLAFF, H., 103, 106, 111.
DONSKER, M. D., 486.
DOOB, J. L., 485, 657, 668.

EDGEWORTH, F. Y., 135, 137, 473.
Edgeworth series, 135.
EGGENBERGER, F., 311.
Equally likely cases, 157, 160.
Estimate, 547.
consistent, 560.
maximum likelihood, 547, 549, 555.
asymptotic distribution of maximum likelihood, 462, 465, 556, 654.
consistency of maximum likelihood, 551.
examples of maximum likelihood, 549 ff.
minimum variance, 560, 562.
unbiased, 559.
Excess, 375.
Expectation, 118, 119.
with respect to m-dimensional distributions, 152.
Inequalities for product and quotient, 400.

F-distribution, 414.
approximate mean value of, 415.
FELLER, W., 43, 111, 276, 299, 303, 317, 668.
FERMAT, P, de, 157.
Field (of sets), 20.
extension of the field of definition of the collective, 73.
of α-sets, 65.
of Borel sets, 57.
of $\mathcal{J}$-sets, 74, 83, 85.
of (Lebesque) measurable sets, 57, 85.
Probability—induced by experimental rule, 100, 102.
Finite automaton, 219.
FILIPPOWA, A. A., 655.
de FINETTI, B., 73, 99.
FISHER, R. A., 405, 443, 509, 548, 562, 593, 641, 668.
FORTET, R., 668.
Fourier transform, 245.
FRANK, P., 137, 486-8.
FRÉCHET, M., 45, 124, 192, 213, 214, 216, 544, 561, 616, 668.
Fréchet's inequality, 561.
FROBENIUS, G., 213.
F-test, 446.
Frequency approach, 43, 45, 58.
Frequency distribution, *see* Repartition.
Frequency models, 103.
Functionals, 616.
differential of, 662.
first (partial) derivative of, 621.
Taylor's formula for, 628.

Gamma distribution, 248.
characteristic function of the, 248.
tables of values of, 677.
GARTI, Y., 651.
GAUSS, C. F., 126, 358, 442, 548, 550.
Gaussian distributions, *see* Normal distribution.
Gametes distribution, 204.
asymptotic, 209.
Gametic proportions, 205.
constancy of, 205.
Generating function, 243.
Genotypes, 203.
distribution of, 203.
GEIRINGER, H., 48, 192, 207, 306, 309, 310, 366, 440, 470, 582, 583, 636, *see also* Pollaczek-Geiringer, H.

SMIRNOV, N. V. S., 473, 482, 483, 485, 488, 490-2.
SNEDECOR, F., 415, 416.
Smoluchowski's equation, 326.
Space of sequences, 61, 99.
one-to one correspondence of linear continuum to, 69.
Standard deviation, 115, 383.
Standard error, *see* Standard deviation.
Statistical functions, 358, 610, 613, 616.
asymptotic behavior of, 664.
asymptotic expectations of, 657.
(arithmetic distribution), 658.
(continuous distribution), 662.
asymptotic expectation and variance of, 610.
bilinear, 618.
classification of, 664, 666, 667.
continuity of, 619.
derivatives of, 623.
differentiability of, 620.
higher derivatives of, 626.
homogeneous of degree r, 618.
Inference on, 358.
lemma for, 642.
limit theorem of type one (arithmetic distribution), 645, 647.
(continuous distribution), 648, 651.
linear, 617.
of type one, 641.
STIELTJES, T. J., 92, 96, 394.
STIRLING, J., 271, 272.
Stirling's formula, 271.
Stochastic process, 319.
additive continuous, 324.
additive time-dependent, 319.
continuous, 320.
elementary discontinuous, 320.
general discontinuous, 323.
Markovian, 320.
stationary, 320.
STUDENT, 443.
Student's distribution, 411, 443.
mean of, 412.
table of, 680.
variance of, 413.
Student's test, 443.
difference of two means, 444.
Sufficient statistic, 562.
Sum of chance variables, 224, 313, 317, 362.
asymptotic distribution of, 263.
Generating function of a sum of independent chance variables, 249.
limit distribution of the sum of independent discrete random variables, 276, 305.
mean of a sum of independent chance variables, 225.
variance of a sum of independent chance variables, 226.
SZEGOE, G., 137.

TAMARKIN, J. D., 396, 666.
TCHEBYCHEFF, P. L., 230, 394.
Tchebycheff's inequality, 115.
generalizations of, 125.
Tchebycheff's theorem, 231.
t distribution *see* Student's distribution.
Testing hypotheses, 504.
acceptance region, 505.

alternate hypothesis, 505.
composite hypothesis, 508.
error chance, 506, 579.
error of the first kind, 506.
error of the second kind, 507.
generalization to several dimensions, 524.
level of significance, 508.
likelihood ratio test, 515.
most powerful test, 510.
null hypothesis, 505.
power function, 509.
probable limits, 518.
rejection (or critical) region, 505.
simple hypothesis, 507.
simple vs. simple, 513, 528.
success chance, 506.
success rate, 516, 526.
Theory of errors, 355.
first limit theorem, 356.
inference on the true value, 356.
second limit theorem, 357.
